90 South 9th Street, #1510
Minneapolis, MN 55402

Dear Sir or Madam:

You may not be aware of what I am about to say. The walls in these apartments are extremely thin. Thus, when you are working in your kitchen, the noise from shutting cabinet doors and drawers sounds like loud construction on my side of the wall. This noise repeatedly wakes me up and/or prevents me from sleeping. The following dates represent just a few of the times when noise from your kitchen has interfered with my sleep:

- Around 11:35 p.m. on Tuesday, January 15th
- Around 10:45 p.m. on Wednesday, January 16th
- Around 5:30 a.m. last Thursday or Friday
- Around 9-10:15 p.m. last night.

Would you please be more quiet and minimize the level of noise coming from your apartment? When I work in my kitchen, I try my best to shut the cabinet doors and drawers versus letting the doors and drawers swing shut and bouncing ☺ Note that the Resident Manual for The Metro Apartments states, "Please keep loud noise and disturbing sound and vibrations to a minimum, especially during the hours of 10:00 p.m. to 9 a.m."

I sincerely appreciate you respecting my home and being considerate with minimizing the level of noise coming from your apartment. And, I hope both of our homes will enjoy staying at The Metro Apartments.

Thanks so very much!

Sincerely,

Resident at #1509
